

## **SOUTHERN WIND RENDEZVOUS AND TROPHY 2021**

The fifteenth edition of the biannual **Southern Wind Rendezvous and Trophy** will take place in Porto Cervo, from 1-5 June 2021 hosted within the 2021 Loro Piana Superyacht Regatta. This important event celebrates Southern Wind 30th Anniversary, an important milestone that seals the shipyard's success in the production of high-performance sailing superyachts from 27 to 40m.

This summer seems to offer the conditions to be back at sea and Southern Wind, in collaboration with the Loro Piana Superyacht Regatta's Title Sponsor and the event's host, the Yacht Club Costa Smeralda, is working hard to organize a safe and enjoyable event.

All Southern wind yachts with LOA of 21metres or above are eligible for the SWS TROPHY, lastly won in 2019 by the **SW82 Grande Orazio**.

In the wake of the success of the recent, smaller "Southern Wind family events," the shipyard proposes alternative programs both at sea and ashore for owners who want to spectate the racing and enjoy the unique atmosphere of this prestigious event. All yachts signing up as non-racing participants will enjoy the **Rendezvous program** of short fleet sails through the "Arcipelago della Maddalena" and enchanting anchorages in some of the Sardinia's most breath-taking bays.

An **Official dinner** will be dedicated to **Southern Wind Owners** and will be held on June 3rd at the restaurant "Giagoni in Piazza" in lovely San Pantaleo.

## **ABOUT SOUTHERN WIND**

Southern Wind Shipyard was founded in **Cape Town** in **1991** by the engineer **Willy Persico**, a charismatic entrepreneur who made the shipyard an international success story that continues today, almost three years after he sadly passed away. This continuity comes thanks to the fact that Persico passed the helm to his **closest managers** and to a team of **three international shareholders** with a clear vision and fresh outlook who are also sailors and yachtsmen. With a production rate of two yachts per year, Southern Wind boasts a leading positioning in the market of **performance carbon yachts from 27 to 40m**. They embody notions of **seaworthiness, reliability** and **sailing exhilaration** without compromising on the comfort expected of a luxury cruiser. The know how gained in the design and assembly process of 56 performance cruisers in the range of 30m+, guarantees the development of increasing dependability and continuous innovation even in the construction of custom projects, two of which were delivered in the last 4 years. At the heart of Southern Wind success is indeed the ability to find the right balance between customization, quality and production efficiency. Southern Wind Shipyard's new course sees a globally orientated company in expansion.
